

Wolffepack®: The Orbital Backpack, an Award-winning Design

Product features of the Wolffepack® 'Metro'

Wolffepack®, the orbital backpack, is a radical new concept in backpack design that swings all your gear to your front but stays strapped to your back.

"Reinventing the backpack"	Daily Mail
"A smart new design"	Daily Telegraph
"Wolffepack fixes the bag's biggest design flaw"	PSFK Design
"A radical new design"	Daily Express
"These clever gents have designed a backpack giving you the best of both worlds"	Core77 Design
"Wolffepack solves the biggest problem with backpacks"	Trendhunter

It's unique and patented **expetoSYSTEM®**, an orbital trapeze technology frees the pack to swing around your body using super-strong cords.

A British invention, the Wolffepack®'s unique and award-winning design:

- gives better and quicker access to stuff inside the pack
- offers more comfort by avoiding bumping fellow passengers and 'backpack rage', and by allowing the user to sit comfortably with the pack still on
- provides greater security; it can be securely and comfortably hooked on the front of the body where valuables are in sight

Capacity: 22 litres approx **Weight:** 1.4kg approx

Laptop Sleeves: Padded and soft microfiber-lined for a laptop up to 15"/38cm plus a sleeve for tablet computer
